Hazardous Material Management

Prudent Technologies Inc. hazardous material experts have extensive USAF HAZMAT experience and can assist with the implementation of Executive Order 13423, "Strengthening Federal Environmental, Energy, and Transportation Management". Our knowledge of USAF processes and materials is crucial to meeting installation hazardous waste/HAZMAT reduction goals. Our people understand Technical Orders, Military Specifications, and Qualified Products Listings and can effectively recommend approved products that may have reduced toxicity or provide regulatory relief.

Hazardous Material Management Services

- Conduct an installation AF-EMIS/EESOH-MIS data call
- Compare AF Form 3952 HAZMAT Authorizations to HAZMAT issues
- Validate Authorizations
- Determine unused, excess, or expired HAZMAT
- Assess HAZMAT/Hazardous Waste Recycling Options
- Explore product substitution options acceptable by TO, MILSPEC, or QPL
- Assess waste collection practices to determine if additional waste segregation will reduce amount generated

Hazardous Waste Management

Finding the most cost-effective way to transport and dispose of hazardous wastes in compliance with federal, state, and local regulations is a complex challenge Prudent Technologies Inc., meets safely, efficiently, and economically. From generation to final disposal, we strive to provide clients with choices that allow for the most economical, yet compliant, decision.
